

## WMT-ALU-RIB AR5500

The hull of our new ALU-RIB-5500 is made of saltwater-resistant Aluminium-alloy and the tube is made of Hypalon (1500g/m<sup>2</sup>)

The special WMT-hulldesign gives us high stability, very smooth driving in rough conditions combined with an extrem manoeuvrability.

The recommended propulsion is from 90 to 115 hp. There are single- and double-installations possible.

In the inside you find place for two rows of seats behind the helmet-console and 2 m (!) flat floor in front.

### techn. Data:

length: 5,65 - 6,10m  
(different tube-length possible)  
width: 2,35 m  
weight: from 600 to 800 kg  
(incl.engine)  
max. engine: 140 hp  
max. load: 12 pers.

Color and equipment is adaptable to customers wish.
