

WMT-ABB-8100-KH

Drop-Bow-Boat type **ABB8100KH** in basic version with middle-steering-stand and two Honda BF130 outboard engines

Also with a length of more than 8m our WMT-hull has an extrem maneuverability even at full speed it is very stable and save

The special WMT-hull has a “deep V” in the bow area and gives it good conditions in rough sea but also a good stability during working operations

Of course it is possible to deliver the boats with single engines, jet-drives or sterndrives
